

# Structure.Gantt Pricing Changes

We've invested a lot of effort in Structure.Gantt, and the product is getting more mature. To further support the active development, we've decided to make it a paid app starting with version 2.0. This version supports Agile planning, resource constrained scheduling, baselines and a number of other features.

To help our existing customers with this transition we were offering them a free license for Structure.Gantt with 2 years of maintenance/subscription. This program is officially closed, but if you do have an active Structure license, which was purchased before the release of Structure.Gantt 2.0 and you wish to obtain this free license, please submit a request on our [customer portal](#) and we'll consider it.

## FAQ

Questions	Answers
When will Structure.Gantt pricing take effect?	The new pricing takes effect with the release of Structure.Gantt 2.0.
Can I continue to use Structure.Gantt for free?	You may continue to use Structure.Gantt 1.x for free for as long as you wish, but you will not be entitled to new releases including version 2.0 or customer support unless you obtain a paid license.
