

Dark Features

Dark features are additional features or behavior modifications that are usually hidden from the user. However, JIRA administrator can turn them on for their instance.

Alternative initial values for project/type when creating an issue in dialog

Normally, when the user creates new issues through dialog, Structure remembers the selected project and issue type and offers them next time by default. This dark feature enables a different algorithm, which used to work in a previous version of Structure: the initial project and issue type are taken from the issue that was focused when "+Create" or "+Next Issue" was pressed.

System property	<code>structure.feature.altInitialValuesInDialog</code>
Options to add in setenv.sh / setenv.bat	<code>-Dstructure.feature.altInitialValuesInDialog=true</code>
Internal feature name	<code>altInitialValuesInDialog</code>
Introduced in version	2.11.0
