

Horizontal Scrolling

By default, all of your columns are resized to be visible within the Structure panel. To make it easier to work with multiple columns or larger columns, you can turn on horizontal scrolling. This will allow you to work with as many columns as you need and set their sizes as large as necessary for easy viewing.

The screenshot shows the Jira Structure panel with a table of items. The table has columns for Summary, Key, Progress, and Status. A settings menu is open on the right, and a red arrow points to the 'Horizontal scrolling' toggle switch, which is currently turned on. The table contains the following data:

| Summary | Key | Progress | Status |
|------------------|-------|------------|--------|
| ↳ Epic 1 | LS-9 | ██████████ | |
| ✓ ↳ Story 1 | LS-2 | ██████████ | |
| ✓ ↳ Sub-task 1.1 | LS-6 | ██████████ | |
| ↳ sub-task 2 | LS-12 | ██████████ | |
| ↳ Story 2 | LS-3 | ██████████ | |
| ↳ Sub-task 2.1 | LS-4 | ██████████ | |
| ↳ Sub-task 2.2 | LS-5 | ██████████ | |
| ✓ ↳ Task 2.1 | LS-10 | ██████████ | |
| ↳ Epic 2 | LS-8 | ██████████ | |
| ↳ Story 3 | LS-1 | ██████████ | |

To enable horizontal scrolling:

- Click the Add Column icon “+”
- Click the **Horizontal scrolling** toggle.

Once you turn horizontal scrolling on, your view may no longer fit within the viewing panel. In this case, a horizontal scrollbar will appear at the bottom of the panel. Sliding this from left to right will allow you to bring different columns into view.

Pinned Columns

Not all columns move when you scroll. The [Summary column](#) remains visible at all times, so you can keep track of essential information as you focus in on other columns.

Saving Horizontal Scrolling Settings

Structure allows you to save your horizontal scrolling settings for a particular view.

For example, by default, the Basic View only shows a few essential columns. Keeping horizontal scrolling disabled for this view makes sure all of your essential information is visible at a glance. On the other hand, the Planning view often has several columns and might be easier to scroll through than trying to view all together.

To set your horizontal scrolling preference for a saved view:

- [Locate the view](#) in the Views Menu
- Highlight the view and click the Edit link
- Under the Properties tab, check or uncheck **Horizontal scrolling**

Horizontal scrolling

You cannot edit system views (Basic, Planning, Tracking, etc.). In order to enable/disable Horizontal scrolling for one of these views, you must create a new view using **Save As**. See [Saving and Sharing Views](#).
