

API (Version 2.2+)

Structure.Testy API description is available here: <http://almworks.com/testy/apidocs/v3/>

We also introduced the Swagger UI, it is available via link like **<You JIRA address>/rest/testy/3/rest-browser/**. Our public demo JIRA instance is available at <https://demo-structure.almworks.com>, so the URL for Swagger UI is <https://demo-structure.almworks.com/rest/testy/3/rest-browser/> (you should be logged in JIRA first)
