### End of Life:

- For beta and release candidate versions: Beta versions may be scheduled to expire after a certain amount of time. In any case, the lifespan of such a pre-release version is not supposed to be longer than 3 months. You will need to upgrade to a newer version before the end-of-life date.
- For other versions: You will be able to use this version of the plugin indefinitely; however, after the end-of-life date, the support for the version is limited.
