

# Issue Structure

## Structure Plugin adds Multi-Level Issue Hierarchy to JIRA.

- Issues may have **sub-issues**, which can have sub-issues of their own of any issue type (solution to the **subtask-of-a-subtask** problem).
- Time tracking for all sub-issues is aggregated in the parent issue.
- Visual structure editor allows quick creation of new issues and arranging existing issues into a hierarchy.

### Screenshots

The image contains six screenshots of the JIRA interface, arranged in a 2x3 grid, illustrating the use of the Issue Structure plugin:

- Mars Colonization:** Shows a hierarchical tree view of issues under a parent issue. The tree is collapsed, showing a single node labeled "Mars Colonization".
- Mars Colonization:** Shows the same hierarchical tree view, but one node under "Mars Colonization" is expanded, revealing its sub-issues.
- Mars Colonization:** A close-up view of the JIRA sidebar showing the "Issue Navigator". It lists several issues, including "Mars Colonization" and its sub-issues, along with their status and priority.
- Space Ships:** Shows a hierarchical tree view of issues under a parent issue. The tree is collapsed, showing a single node labeled "Space Ships".
- Space Ships:** Shows the same hierarchical tree view, but one node under "Space Ships" is expanded, revealing its sub-issues.
- Space Ships:** A close-up view of the JIRA sidebar showing the "Issue Navigator". It lists several issues, including "Space Ships" and its sub-issues, along with their status and priority.
