# Uninstalling and Reinstalling Structure

## Uninstalling Structure

You can uninstall Structure from Plugin Manager the same way you uninstall other plugins. You can also manually remove structure JAR from `plugins /installed-plugins` directory when JIRA is not running.

When you uninstall Structure plugin, Structure data is **not removed**. It remains in place in `structure` sub-directory under JIRA home. (See Structure Files Location.)

After you have uninstalled Structure, you can completely delete its data by removing `structure` sub-directory. (We advise to at least create a backup copy though.)

> ✅ Structure License is not kept in the Structure database, but in the main JIRA database. If you'd like to remove Structure license, you need to open **Administration | Structure | License Details** menu and use **Uninstall License** from that page – before you uninstall the plugin.

## Reinstalling Structure

It is perfectly safe to uninstall Structure plugin, then install it back again. (This happens, for example, when you upgrade to a newer version.)

All Structure data will be there unless you manually remove it.
