

Structure Widget Overview

The screenshot displays the JIRA Structure widget for the 'HyperDrive Project'. The interface includes a top navigation bar with 'Dashboards', 'Projects', 'Issues', 'Agile', and 'Structure' tabs. The 'Structure' tab is active, showing a hierarchical list of issues. The issues are organized into a tree structure, with sub-issues indented under their parent issues. The table columns include 'Key', 'Summary', 'Progress', 'TP', and 'Σ Original Estimate'. The 'Progress' column shows progress bars for each issue. The 'TP' column shows the type of issue (e.g., Task, Story). The 'Σ Original Estimate' column shows the original estimate in weeks (e.g., 1w). The 'Current structure' is highlighted in blue. The 'Current view' is indicated by a gear icon in the top right corner. The 'Issue operations drop-down' is shown as a gear icon next to the 'DRIVE-8' issue. The 'Get help and send feedback' link is located in the bottom right corner. The 'Toolbar' is located at the top of the widget, containing various icons for navigation and actions. The 'Configurable columns' are indicated by a red arrow pointing to the column headers. The 'Drag and drop handle' is indicated by a red arrow pointing to the vertical line on the left side of the issue list. The 'Sub-issues are indented' is indicated by a red arrow pointing to the indentation of the 'EMPR-2' through 'EMPR-6' issues.

Structure widget is a grid with adjustable columns that displays the issues as a hierarchical list. Structure widget is displayed on the [Structure Board](#), [Issue Page](#) and in [other places in JIRA](#).

Structure lets you navigate the hierarchy and search for specific issues.

Besides showing the Structure and allowing to navigate it, structure widget is the primary tool to change structure by rearranging issues in the hierarchy or using JIRA actions to work with every issue.
