Bundled Synchronizers

There are several bundled synchronizers coming with the Structure. Other synchronizers can be provided by other JIRA plugins.

- Sub-Tasks Synchronizer Sub-Tasks Synchronizer lets you have sub-tasks automatically placed under their respective parent issues in the structure.
- Filter Synchronizer Filter Synchronizer lets you automatically add issues to structure or remove issues from structure based on a Saved Filter or a JQL query.
- $\bullet \ \ \, \text{Links Synchronizer} \text{Links Synchronizer maintains issue links between parent issue and children issues}. \\$
- GreenHopper Synchronizer GreenHopper Synchronizer lets you synchronize the position of issues in the structure and on a GreenHopper board (such as a Scrum or Kanban board, or the Classic Planning Board) using Rank synchronization, and synchronize an Epic field with the position of stories under epics in the structure.
- Status Rollup Synchronizer Status Rollup synchronizer automatically aggregates statuses of the sub-issues and updates the status of the
 parent issue. For example, it can make parent issue Resolved if all sub-issues are Resolved.
