Structure. Testy User's Guide

Structure. Testy is a lightweight testing extension for Structure. It allows you to create and maintain test checklists simply by adding a test run column to any structure. By taking advantage of Structure's ability to manage hierarchical lists, you can build custom test sheets to quickly mark and view test step results in separate columns.

Learn to Use Structure. Testy

- Adding Test Runs to the Structure
 - Creating a New Test Run
 - Opening an Existing Test Run
 - Test Run Column Display Options
- Changing Test Results
- Customize Statuses
- Filtering Structure by Test Run Status
- Test Management Tips
