

Outbox

Outbox is a folder located in [Navigation Area](#) in a particular [connection](#), under default and user [queries](#) and marked with Outbox icon . This folder stores the following types of issues:

- created and/or modified when you were offline,
- commented and voted,
- intended for later upload (if you clicked the **Save Draft** button when when [modifying or editing them](#))

Issues remain in this folder until you [upload](#) them explicitly or get online.
