

JIRA Pages with Structure

Issue structure is displayed by the **structure widget**, which is located in several places in JIRA - on a dedicated Structure Board, on the issue page, on the project, component and version pages. The widget displays a scrollable grid with the hierarchical list of issues and lets you work with the structure as well as with every issue.

Most functionality of the structure widget is the same on every page, however there are few specific things that the structure does on an issue page and on project/component/version pages. You can work with the structure on the page that's most convenient for you:

- [Structure Board](#)
- [Structure on the Issue Page](#)
- [Structure Gadget](#)
- [Structure on the Project, Component and Version Pages](#)
- [Structure on Agile Boards](#)
- [Structure on the Issue Navigator Page](#)

If you need to go to the Structure Board from any other page with the widget, click the **Open** link in the bottom of the widget. This will open the currently viewed structure on the Structure Board.

The screenshot shows the JIRA Structure widget titled "Structure: Global Structure". It features a search bar, a toolbar with icons for navigation and actions, and a table of issues. The table has columns for Key, Summary, Progress, and TP. Three issues are listed: HDE-29 (Hyperdrive), HDE-14 (Safety & Comfort), and HDE-45 (Safety duct and extra field pressure dissipator - Exces). The HDE-45 issue is selected. At the bottom of the widget, there is a link to "Open" and an "Info" icon.

Key	Summary	Progress	TP
HDE-29	Hyperdrive	<div><div></div></div>	 
HDE-14	Safety & Comfort	<div><div></div></div>	 
HDE-45	Safety duct and extra field pressure dissipator - Exces	<div><div></div></div>
