

Correcting Input Errors

If you enter an incorrect value when editing a field, or if there are any other problems saving that value on the server, Structure widget will display a warning message and mark the cells with the problems.

Key	Summary	Assignee	Fix Version/s	Due Date

Warning message. Click to open field editor.

Click on the warning message or on the cell with the error to enter Edit Mode, see problem details and correct the error. You can:

- correct the value and hit **Enter** or click **Done** to try to save the values on the server again, or
- click **Revert Field** to restore a previous value of the field, known to be valid, or
- click **Cancel Changes** to cancel all changes to this issue, including possible changes to other fields.

25/Jab/12

You did not enter a valid date.
Please enter the date in the format "d/MMM/yy", eg. "5/Jan/12"

Please fix the problems and try again, or [Cancel Changes](#).

Revert Field Done

You can edit other issues and otherwise work with the Structure widget before fixing the editing problem. However, it is advised to correct the error as soon as possible.

Input Errors when Creating a New Issue

If the error happens when saving a new issue on the server, saving any further changes on the server is suspended – until the error is fixed or the creation of the new issue is cancelled. This is a necessary measure as the success of the following changes may depend on the success of the creation of that new issue.

When you have errors in the fields of a new issue, fix them as soon as possible or cancel the creation of that issue. Otherwise, any further changes are not uploaded until the problem is fixed and you risk losing them!

You can cancel creation of a new issue if you select it and click **Delete** button or hit **Delete** key.
