Using Structure Gadget in Confluence

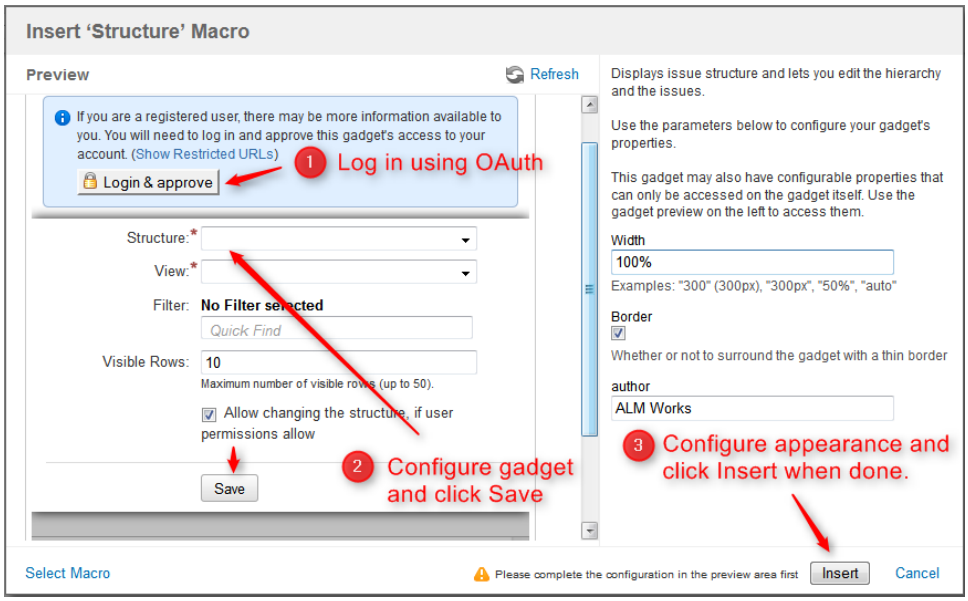
You can embed Structure Gadget in a Confluence page and view or edit structure in Confluence.

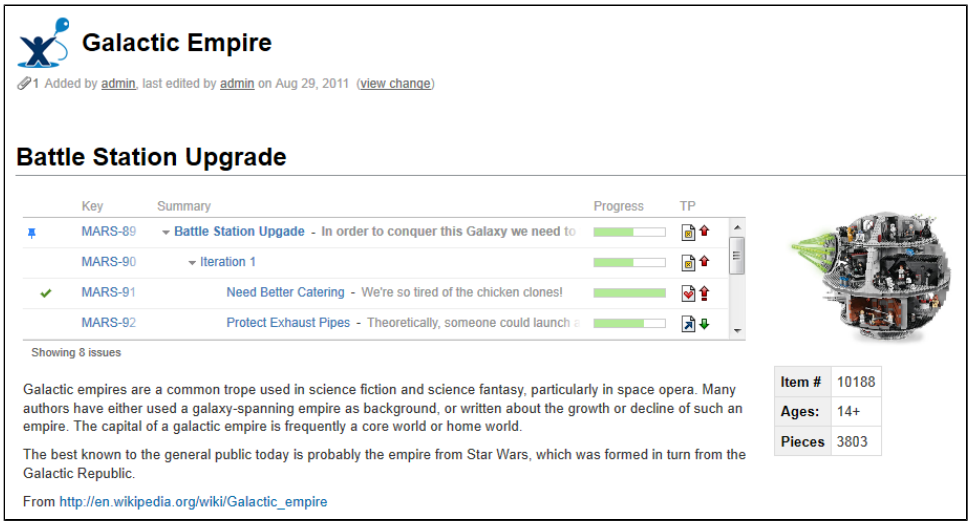
> Before you can use Structure Gadget on a Confluence page, your Confluence administrator must add Structure Gadget to Confluence Configuration. If you try to insert a macro and don't see *Structure* in the list, most likely the gadget is not configured.

> The displayed Structure gadget is not suitable for printing. Support for printable Structure gadget is coming next. So far, please use Printable Page to print a structure separately.

How to Add Structure Gadget

1. When editing a page, click Insert/Edit Macro, and select **Structure**. Macro configuration dialog appears.





2. If **Login & approve** button is shown, you need to log in into JIRA first.
3. If **Structure plugin not available** message appears, then you currently don't have any visible structures. Probably you need to login.
4. Configure gadget - select the structure to be displayed and configure other parameters, then click **Save**.
5. Configure gadget appearance, for example, set **width** to **100%** and **border** to **not selected**.
6. Click **Insert** and you're done!
