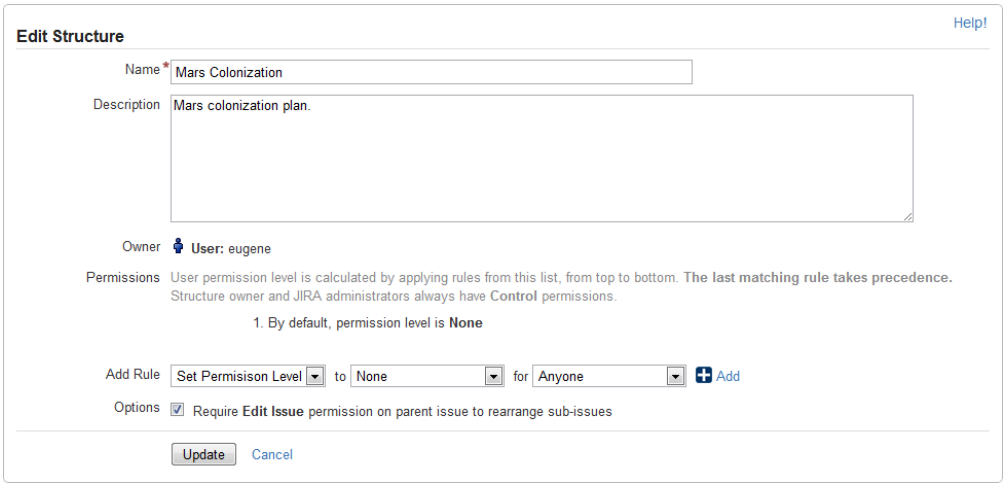
# Structure Details

Every structure has the following parameters:

| | |
|---|---|
| **Name** (*required*) | Name is used to identify the structure in the drop-downs like the *Structure* menu in the top navigation bar. |
| **Description** | Used to describe the meaning of the structure to the users. |
| **Owner** | The owner of the structure. Only JIRA administrators can change the owner. |
| **Permissions** | Define who can view, edit or configure the structure. See Structure Permissions for details. |
| **Require Edit Issue Permission** flag | When *Require Edit Issue permission on parent issue to rearrange sub-issues* flag is set, additional permission constraints are applied to figure out what changes the user is allowed to make. See Structure Permissions for details. |



You can specify structure details when Creating New Structures and when Editing Structure Details.
