

Removing Issues from Structure

To remove an issue from the current structure, select this issue and press **Delete** button on the keyboard or click **Delete** button on the toolbar. The issue is removed with all its children issues.

You can [select multiple issues](#) and remove them all in one action.

The issue will be removed from the structure and placed into the [Removed Issues](#) secondary panel. You can access it by clicking the **Trash** icon  in the top right corner. To move removed issues back into the structure, simply select them in the Removed Issues panel and use [Drag-and-Drop](#) or [Copy & Paste](#) to place the issues in the structure.

Once you leave the current page, the Removed Issues panel is emptied.

Removing an issue from a structure does not delete the issue itself. It just removes it from the current structure.

Removing issues can be [undone](#).
