# Structure Developer's Guide

**Coming Soon!**

Dear fellow developers,

Unfortunately, Structure APIs are not finalized in Structure 3.0. The architecture of the product changed considerably and the old API is no longer supported. We're doing our best to come up with a well-documented, stable, usable and simplified (to a reasonable extent) Java and REST API and hope to deliver it soon with an update of Structure 3.

I apologize for the inconvenience this causes. This is a once-in-a-product's-lifetime event for Structure and we hope for your understanding.

We expect that you might be eager to update your add-on or integration so it works with Structure 3. Please write us to support@almworks.com if you'd like us to provide personal advice on integrating with Structure 3.0, before the new APIs are published.

Kind regards,
Igor Sereda
Founder and Software Developer, ALM Works
