

# Structure Files Location

## Structure Files

**`$JIRA_HOME/structure`**

Structure keeps most of its data in the `structure` sub-directory under the [JIRA home directory](#).

On JIRA Data Center, a local filesystem is used.

### Cache files

Structure uses file system to temporarily store some of the internal runtime database, involved in Automation feature. These files may be stored in "rows0", "rows1" and similar directories.
