

Selecting Multiple Issues

Structure allows you to select multiple issues and do most of the operations with selected issues at once.

Usually, you navigate structures and select a single issue for further actions with keyboard arrows or mouse. The selected issue is highlighted with the blue background, and the actions (like moving) apply to the highlighted issue only.

Entering Multi-Select Mode

You can select multiple issues and switch Structure widget into multi-selection mode in one of the following ways:

- Press *Space* to add currently focused issue and move to the next issue.
- Click grey dot in the beginning of an issue row to toggle its selection.
- Hold *Shift* and use Up and Down arrows to select a range of issues.
- Hold *Shift* and use Right/Left arrows to select/deselect the focused issue with all its sub-issues.
- Hit *Ctrl+A* (*Command+A* on Mac) to select all issues.

Selected issues are marked with a filled circle, and the bottom line shows the total number of selected issues.

●	DRIVE-2	▼ Fuel Efficiency
	DRIVE-10	▼ Cosmo-dynamic hulls for less drag by cosmic dust
●	DRIVE-20	Polymorphic shield
	DRIVE-19	Design the hardware platform
	DRIVE-9	▼ Use reverse hyper-driving to accumulate energy on braking
●	DRIVE-13	Expand the range of material that can be used as the fuel
●	EMPR-2	▼ Warp drive mode - We need to be able to move with sub-light speeds within
●	DRIVE-6	Simplify initiation of auto-destruction sequence - It really shouldn't be th
●	EMPR-6	Strange effects when hyper-jumping near a black hole - Last time we u
●	DRIVE-8	Hot-pluggable heat drain for the kitchen - We might use excess heat to cool
●	EMPR-5	Static electricity on the control handles - For some reason, static charge acc
	EMPR-3	Secret button to shut down the Rebels hyperdrive - This would be real nice!
Selected 9 of 16 issues		

Some of the issues are selected.

Special Selection Markers

If you collapse a list of sub-issues, and some of the sub-issues are selected, then the visible parent issue will display hints about whether it contains selected sub-issues.

For example, if you collapse sub-issues of *DRIVE-10*, *DRIVE-9*, and *EMPR-2* in the example above, you will see these selection markers:

●	DRIVE-2	▼ Fuel Efficiency
○⌵	DRIVE-10	▶ Cosmo-dynamic hulls for less drag by cosmic dust
○⌵	DRIVE-9	▶ Use reverse hyper-driving to accumulate energy on braking
●⌵	EMPR-2	▶ Warp drive mode - We need to be able to move with sub-light speeds v
●	DRIVE-8	Hot-pluggable heat drain for the kitchen - We might use excess heat to
●	EMPR-5	Static electricity on the control handles - For some reason, static charg
	EMPR-3	Secret button to shut down the Rebels hyperdrive - This would be real i
Selected 9 of 45 issues		

Some of the issues are selected; some of the selected issues are collapsed under their parent issues.

The meaning of the markers is the following:

	DRIVE-10	DRIVE-10 itself is not selected, but some of its sub-issues are selected
	DRIVE-9	DRIVE-9 itself is not selected, but all of its sub-issues are selected
	not on the example	the issue is selected, and some of its sub-issues are selected
	EMPR-2	EMPR-2 is selected, and all its sub-issues are also selected

Exiting Multi-Select Mode

Hit *Escape* key to clear multiple selection and exit multi-select mode. You can also hit Ctrl+A (Command+A) twice – first key stroke will select all issues, second one will un-select all issues.

Restoring Selection After Navigation

If you navigate to a different page while having multiple issues selected and then return back, the selection will not be automatically restored. You can click **Restore Selection** link at the bottom of the Structure widget to select the same issues that were selected previously.
