

Views Menu

You can switch to another view by pulling down Views menu and selecting one of the views it offers, or searching for a different view.

To open Views menu on the Structure Board, click current view name; on an issue page and project page click the Views icon.

Apart from the list of views the Views drop-down shows important information about the current view.

The screenshot shows a software interface with a top toolbar containing various icons for adding, editing, and deleting items. Below the toolbar is a table titled 'Manually Built Structure'. The table has columns for 'Key', 'Summary', and 'TP'. The table content includes a hierarchy of items: 'Theme Park Construction' (expanded), 'Regulations and Standards', 'Site preparations' (expanded), 'The Proposed Park Plan', 'Location Map' (expanded), 'Structure Gadget', 'Relocate trees - Trees are totally getting in the way' (expanded), 'Find the transport company', 'Relocate Elves - The Mountain Elves that dwell in the mountains' (expanded), 'Remove waste rock and soil - After bulldozing the site', 'Bulldoze French Alps - Someone put a great big bulldozer in the Alps', and 'Rent the excavation equipment'. The 'Basic view' menu is open, showing the current view name, a 'Modified' status, and links to 'Save', 'Save As', and 'Revert'. It also shows 'Shared with everyone' and a 'Change' link. Below this is a search bar labeled 'Search View'. The 'ASSOCIATED VIEWS' section lists 'Basic view' (selected) and 'Planning'. The 'OTHER RECENT VIEWS' section lists 'Tracking', 'Triage', 'Entry', and 'Compact'. A 'Manage Views...' link is at the bottom of the menu. The table at the bottom shows 'Showing 47 items' and an 'Info' icon.

In the menu you can see the following:

1. Current view name. Hover mouse over the name to see the tooltip with the view description.
2. If the view was modified, you'll see the corresponding message and links, which allow you to save or revert the changes.
3. Permissions settings and a link to change them.
4. View search. Start typing the view name and results will be filtered as you type.

✓ Search looks for any views that match the entered name, not only those in this list.

5. Associated views list. This list can be customized for each structure by the structure owner or anyone who has Control access level on the structure – see [Customizing View Settings](#).
6. List of views you have recently used (excluding the views shown in the section above).
7. Manage Views link opens [View Management](#) dialog.

Switching View with Keyboard

You can switch current view only using keyboard:

1. Use **vv** shortcut to open Views menu (hit "v" twice);
2. Use arrows to select a view, or enter text to search for matching views;
3. Hit **Enter** to switch to selected view or **Escape** to close the menu.
