# Structure Menu

Once you install Structure you will see a new item added to the top-level navigation bar.

If you don't have any structures in your JIRA yet, the menu will allow you to create a new structure or see the Getting Started page, which will help you understand the main Structure functionality:

If you already have several structures, or have access to more than one structure, the menu will look like this:

The menu has several sections:

1. **Current Structure.** Shows the last viewed structure. Click the structure name to open Structure Board with that structure.
2. **Recent Structures.** Shows structures that you've visited recently, or those which have been recently updated. Click a structure to open it.
3. **Favorite Structures.** Lists structures you have marked as your favorite. This section is absent if you don't have any favorite structures
4. **Default Structure.** Shows the system-wide Default Structure. Also, if another default structure is defined for the current project, it is also shown in this section.
