Changing Default Options for the Issue and Project Pages

A number of options define how Structure behaves on issue pages and project pages. When the user opens those pages for the first time, the default settings apply. These settings are adjustable by the Jira administrator.

To change the defaults:

1. Open the **Administration | Structure | Defaults** menu.
2. Scroll down to **Structure User Interface Defaults** and click **Change**.
3. Make the changes and click **Change** again.

Option	Description	See Also
Auto-switch (Issue Page)	Lets you select which structure is initially displayed on issue pages.	Structure Options for the Issue Page
Auto-switch (Project Page)	Lets you select which structure is initially displayed on Project pages.	Structure on the Project Page
Keep Structure Selection When Navigating	If turned on, clicking an issue in the Structure Widget will open that issue's page with the same structure. If this option is turned off, the structure displayed will be based on the Auto-switch setting.	Structure Options for the Issue Page
Auto-minimize Structure Panel	If turned on, the Structure panel on the issue page will be initially minimized if the selected structure does not contain the displayed issue.	Structure Options for the Issue Page

---

ⓘ   If the user changes these options, those changes are preserved and are applied instead of the defaults for that specific user.
