Customizing View Settings

A structure's view settings determine which views are offered to the users in the Views Menu and which view is used by default. To customize view settings for a structure, open the Manage Structures page, locate the structure and click the **Views** link.

Views for Structure "SAFe Overview"   ⍰

A view defines columns displayed in the Structure grid. View settings allow you to choose which views are offered in the **Views** menu for this structure and which views are used by default (if the user hasn't chosen another view). The menu and the defaults can be customized for different Jira pages.

If views are not customized for the structure, global default settings apply.

Structure **SAFe Overview** (ID: 152)
This structure shows how the plugin can be used as a part of the SAFe implementation. The Themes and Program Kanban boards contain the Portfolio epics and Program epics that implement them. They are linked with the Implements link type. Team A and Team B scrum boards have the stories that the dev teams are working on and the epics form the Program board. The structure shows the full hierarchy across all these boards and allows to quickly modify links, epic links and rank as you move issues inside the structure, thus allowing you to work with multiple boards at the same time.

> ⚠ You must have **Control** permissions for the structure to adjust its view settings.

Switching Between Default and Customized View Settings

Initially, each structure uses the default view settings, defined globally for all structures. To customize view settings for the structure, select the **Customized** radio button. The default settings are copied and you can adjust them to your needs.

To revert to the default view settings, select the **Default** radio button.

> ⓘ You can change the default global view settings if you are a Jira administrator – open the **Administration | Structure | Defaults** tab and click **Change** in the Default View Settings section.

Configuring Views Menu

The **Views Menu** section lets you select which views appear under the Associated Views section of the Views Menu for each type of Jira page.

- To add a view to the menu, select the view in the **Add view** drop-down and click **Add**
- To remove a view from the menu, click the **Remove** button
- To change a view's position in the menu, drag the view by the drag handle at the left of the view bar
- To restrict a view's appearance in the menu to some specific pages, click the **Offered on:** line and select the pages where you'd like this view to be used

> ✓ A view is **associated** with a structure if it is part of the Views Menu, as defined by the structure's view settings.

Configuring Default View

In the **Default Views** section, you can select which of the views included in the Views Menu section is the default view for a given Jira page (Structure Board, Structure Board with Issue Details, Issue Page and Project Page). Pick one view from those offered in the drop-down for each page.

> ⓘ If the **Views Menu** does not include any views for a specific page (for example, no views for Issue Page), you won't be able to configure the default view for that page.

> ⚠ Changes take effect when you press **Apply**.
