

Additional Libraries Used in Structure API

Structure API has dependencies on a few open-source libraries that are transitively included in your project when you add a dependency on Structure API.

You don't need to explicitly add dependencies on these libraries.

Integers and HPPC

The open source library [Integers](#) provides collections of primitive types with `java.util`-like interfaces. When working with `Forest`, you will typically use `LongList` and `LongArray` (an implementation of `LongList`).

It comes with another primitive type collection library, [HPPC](#), which provides specific implementations of these collections.

See [API Usage Samples](#) to get the idea how to work with those interfaces.

JetBrains Annotations

Annotations library from JetBrains provides `Nullable` and `NotNull` annotations, used throughout the API.
