Structure 3.3.2 Release Notes

3rd of October 2016 Structure 3.3.2 is a patch release based on Structure 3.3.

Download the Latest Version Structure on the Atlassian Marketplace

1. Patch Release

A If you are using Structure 2, we encourage you to read Structure 3.0 Release Notes – a lot has been changed in Structure 3!

This is a patch release based on Structure 3.3. We have addressed a problem with issue key link not working on the Issue Navigator page in Internet Explorer 11.

Upgrade is recommended for all Structure users who use Internet Explorer.

2. Installation

If your JIRA server does not have Structure yet, the installation is simple:

- 1. Download and install Structure add-on, either from Atlassian Marketplace or from Download page. Pick the correct version based on your JIRA version!
- 2. When Add-on Manager reports about successful installation, click Get Started to visit a page with important guidance for the JIRA administrator. You may also want to check out the user's Get Started page, available under "Structure" top-level menu.
- 3. Monitor catalina.out or jira-application.log for log messages from Structure.

3. Upgrade

⚠

- If you're upgrading from version 2.11.2 or earlier, please read Structure 3.0.0 Release Notes.
- If you have Structure 3 beta or release candidate installed, please read Structure 3.0.0 Release Notes.

Upgrade procedure from versions 3.0.x is simple:

- 1. Consider backing up JIRA data. Use Administration | System | Backup System. Starting from version 3.0.0 Structure data can be backed up together with JIRA data. (If you have a large instance and have proper backup strategy in place, you may skip this step.)
- 2. Install the new version of the plugin.
- 3. Monitor catalina.out or jira-application.log for warnings or errors.
