

# Copying Synchronizers

When [copying a structure](#) that has synchronizers, you can use the **Copy Synchronizers** option to make Structure plugin create a copy of every synchronizer installed in the original structure.

If you don't see the **Copy Synchronizers** option, then you probably have no permission to create synchronizers.

## Synchronizers Copying Parameters

Copy Synchronizers?

☐ No

☒ Yes

Synchronizer ownership:

☒ Leave as is

☐ Make me (admin) the new owner

You can decide to leave the original ownership of a synchronizer ("**Run As**" parameter) or make yourself a new owner for each of the copied synchronizers.

Only JIRA administrators can change synchronizer ownership.

Making yourself the new owner means that all synchronizers in the copied structure will run under your account.

## Required Permissions

To be able to copy synchronizers you need a permission to [create and configure synchronizers](#).

## Copied Synchronizers

When structure copying is complete, all of the copied synchronizers become disabled until you run **Resync & Enable** manually. To use them, you need to review their configuration, adjust if necessary, and run **Resync & Enable**.
