

Structure 3.3.2 Release Notes

3rd of October 2016

Structure 3.3.2 is a patch release based on Structure 3.3.

[Download the Latest Version](#)

[Structure on the Atlassian Marketplace](#)

1. Patch Release

If you are using Structure 2, we encourage you to read [Structure 3.0 Release Notes](#) – a lot has been changed in Structure 3!

This is a patch release based on Structure 3.3. We have addressed a problem with issue key link not working on the Issue Navigator page in Internet Explorer 11.

Upgrade is recommended for all Structure users who use Internet Explorer.

2. Installation

If your JIRA server does not have Structure yet, the installation is simple:

1. Download and install Structure add-on, either from Atlassian Marketplace or from [Download](#) page. Pick the correct version based on your JIRA version!
2. When Add-on Manager reports about successful installation, click Get Started to visit a page with important guidance for the JIRA administrator. You may also want to check out the user's Get Started page, available under "Structure" top-level menu.
3. Monitor `catalina.out` or `jira-application.log` for log messages from Structure.

3. Upgrade

- If you're upgrading from version 2.11.2 or earlier, please read [Structure 3.0.0 Release Notes](#).
- If you have Structure 3 beta or release candidate installed, please read [Structure 3.0.0 Release Notes](#).

Upgrade procedure from versions 3.0.x is simple:

1. Consider backing up JIRA data. Use **Administration | System | Backup System**. Starting from version 3.0.0 Structure data can be backed up together with JIRA data. (If you have a large instance and have proper backup strategy in place, you may skip this step.)
2. Install the new version of the plugin.
3. Monitor `catalina.out` or `jira-application.log` for warnings or errors.
