

Changing Structure

There are several basic operations you can do with a structure. They include:

- [Adding existing issues and other items](#) to the structure
- [Moving items](#) inside the structure
- Creating new items inside the structure
- [Removing items](#) from the structure.

There are several ways to make these changes. Some of these operations can be applied to a [group of items](#) and some to individual items only. See the respective subsections for more details.
