Workspace

Definition

JIRA Client workspace is a directory that contains all files and configuration created by JIRA Client, including:

- Local database
- Connections configuration
- Downloaded attachments
- Deskzilla customization files
- Logs

Location

> ⓘ In JIRA Client 3.0, use *Connection* | *Show Connection Info* to see the location of the workspace.

By default, workspace is located in "*.JIRAClient*" sub-directory in the user's home directory. The exact location depends on the operating system and its configuration:

Operating System	Default JIRA Client Workspace
Windows XP	C:\Documents and Settings\username\.JIRAClient
Windows Vista, Windows 7	C:\Users\username\.JIRAClient
Linux	/home/username/.JIRAClient
Mac OS X	/Users/username/.JIRAClient

> ⓘ You can also learn workspace location by looking at JIRA Client main window title. If you don't see the path there, the workspace is at the default location as specified above.
