

Structure.Gantt Roadmap

Updated On	October 2022
Next Update	January 2022

In this roadmap, we'd like to share some features the Structure.Gantt team is going to work on in the near to mid term. The scope of this roadmap is 6 months to 1 year.

A few notes and disclaimers about the roadmap:

- We only list **new, important functionality**— we are also going to work on other stuff, such as improving existing features, improving quality, improving user interface and adding minor features.
- This document lists only upcoming features in Structure.Gantt. We're also working on Structure for Jira and other Structure extensions, which have their own roadmaps.
- The roadmap is subject to change. We will update it periodically so it reflects our current vision.
- We only describe features briefly. If you are interested in the details of some specific feature or can provide feedback and ideas, please let us know at gantt@almworks.com

It is our general approach at ALM Works to focus on the quality of the product. Sometimes this means delivering a product later or changing plans and priorities, as unexpected dependencies and challenges appear. Therefore, while we try to adhere to the announced roadmap, by no means should it be considered an obligation from ALM Works, and it should not be relied upon when making purchasing decisions.

If you have any questions about our roadmap policy, please write to info@almworks.com.

Versions and Dates

We generally aim to release a minor version of Structure.Gantt every 1-2 months and a major version every year. The following is an approximate release schedule for the scope of this roadmap.

Target	Oct'22	Jan'22	Mar'23
Version	3.5	3.6	3.7

Roadmap

Here's the list of major features that we're planning to work on in Structure.Gantt 3.x series up until Structure.Gantt 4.0

- **Fiscal Year Support** — visualize fiscal year on the timeline header (✔ Structure.Gantt 2.7)
- **Jira-based Baselines** — baselines that are based on Jira Custom Fields or Structure Formulas (✔ Structure.Gantt 2.7)
- **Actual Task Start and Finish** — ability to see when work on a task started and when it was finished (✔ Structure.Gantt 2.7)
- **Sandbox Mode** — ability to play with "what-if" scenarios, without affecting the data seen by other users (✔ Structure.Gantt 3.0)
- **Custom colors** — ability to select custom colors for tasks and milestones (✔ Structure.Gantt 3.1)
- **Drag & drop support for more dependencies** — ability to create dependencies of all types using DnD (✔ Structure.Gantt 3.1)
- **Improved critical path visibility** — redesigned critical path for better visibility (✔ Structure.Gantt 3.2)
- **Baseline Start & Finish as Structure attributes** — ability to add Baseline data as Structure columns (✔ Structure.Gantt 3.3)
- **Improved baselines visibility** — redesigned baselines for a better visibility (✔ Structure.Gantt 3.3)
- **Future sprints with dates** — the dates for future sprints can now be taken from Jira (✔ Structure.Gantt 3.4)

Planned for later:

- **Custom chart markers** — ability to add the user markers on the timeline
- **Refined slices** — configuration slices will become easier to set up
- **Artificial tasks** — ability to create lightweight Gantt tasks that don't appear in Jira
