

Getting Started with Structure

Structure comes with a short tutorial that is recommended for everyone who starts working with Structure and for those who have previous experience with Structure 2.11 or earlier. The tutorial is available under **Structure | Get Started** menu.

As it takes some (reasonable) effort to learn Structure before starting to use it efficiently, consider sending out a link to this page to every user in your company who might have use for Structure.

The screenshot shows the JIRA interface with the 'Structure' menu open. The menu options are: RECENT STRUCTURES, Dummy Structure, Plain, something, Query, Create Structure, Manage Structures, and Get Started. The 'Get Started' button is highlighted. Below the menu, the 'structure' logo is displayed. The main content area features two cards: 'Organize' and 'Visualize'. The 'Organize' card has a blue arrow icon and text: 'Anything from your personal backlog to a company-wide portfolio overview'. The 'Visualize' card has a blue bar chart icon and text: 'Multiple Agile projects, linked issues, and any relationships in your company workflow'. A third card is partially visible on the right with the text 'Use gro... othe... structur...'. The background of the interface is a light blue grid pattern.

Introduction

Structure lets you build hierarchical lists, called **structures**, and share them with your
