

Displaying Full Cell Content

In the Structure grid, if the content of a cell is larger than the cell's size, only a part of the content will be shown.

You can view the full content by clicking or hovering mouse pointer over the "More" sign (three vertical dots) that appears at the right side of the cell.

The screenshot shows a Notion workspace with a table titled "Megapolis Structure #277". The table has columns for "TP", "Summary", "M", "Ori", and "Statu". A modal popup is open over the first row of the table, displaying the text "Relocate Elves Change the laws of thermodynamics in our favour the laws of thermodynamics". The modal has a close button (X) in the top right corner. A red arrow points to the close button. The table rows are:

TP	Summary	M	Ori	Statu
📁 ↑	Relocate Elves Change the laws of thermodynamics in our favour the laws of thermodynamics	M	2n	SUC
📁 ↑		M	3n	REM
📁 ↑		M	5n	IN P
📁 ↑		M	3w	NEW
📁 ↑		M	2n	MOV
📁 ↑		M	3n	
📁 ↑		M	5n	
📁 ↑	Marketing + PR activities	M	3w	

To hide the panel with full content, move mouse away, press Esc or click anywhere outside the panel.

You can start editing the cell value even if the panel with full content is shown: double-click the panel or, in case of Summary column, double-click the Summary text in the panel.
