

# Jira Dashboard Gadget

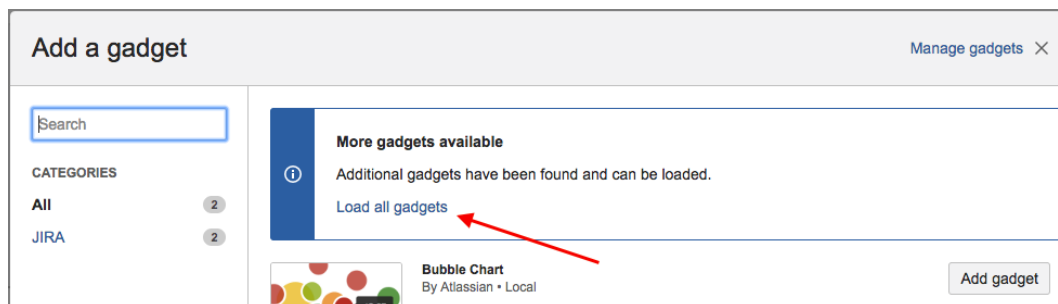

To add the Structure.Gantt gadget to a Jira Dashboard, click **Dashboards** in the top menu and select the desired dashboard, or click **Manage dashboards** to create a new one (see [Atlassian documentation](#) for more details on how to manage dashboards).

Click the **Add gadget** button to display the "Add a gadget" dialog.

Click **Load all gadgets** to display a list of all available gadgets.

Type "Gantt" in the search field, locate the Gantt gadget and click the **Add gadget** button.

The Structure.Gantt gadget will be placed on your dashboard. Before your Gantt chart will appear there, you'll need to set your Gadget Configuration.

## Gadget Configuration

When creating your Structure.Gantt gadget, you can set the following options:

- **Structure** - Defines the structure to load Gantt data for. Please note, only structures with Gantt charts already created are listed.
- **Filter Type** - Allows you to filter the items included in the chart based on a text, JQL or [S-JQL](#) query.
- **Visible Rows** - Defines how many rows of your structure will be visible in the chart at a time. (To see additional rows, you can hold Shift+Left Mouse Button and drag the chart.) Set this value to "0" to see all available rows. Please note, the gadget height may increase significantly if there are a lot of rows.
- **Hierarchy Level** - Defines how many levels to expand the structure and display in your chart. "0" means no expansion at all. Please note, it is not possible to manually expand and collapse structure nodes within the gadget.
- **Start From** - Specifies the first date that will be visible on the chart. You can choose from **Project Start**, **Custom Date** and **Today**. If you select **Today**, the chart will be drawn starting from today, or you can specify a number of days to show prior to today.
- **Zoom Level** - Specifies the zoom that will be used to represent the chart. Available options are: Days, Weeks, Months, Quarters, Years.
- **Year Start** - Dates displayed in the timeline will use the selected month as the start of the [fiscal year](#). For example, if you select November, then November 2020 will be treated as 2021, since this is the start of the new fiscal year. To always display the actual calendar date, leave this set to "January."

- **Baseline** - Specifies whether or not to include a [Baseline](#) in the gadget.
- **Item Information and Chart Details** - These allow you to select which details will be shown on your exported chart.
- **WBS** - Specifies whether the work breakdown structure should be included next to the chart in the gadget. Please note, Issue Key and Summary are the only columns supported by the Structure.Gantt gadget at the time.
- **Width** - If WBS is enabled, this allow you to specify the width (in pixels) of the included structure.
- **Refresh Interval** - Specifies how often the gadget should refresh itself and fetch new data from Jira. By default, this is set to "never", i.e. to update the chart data you need to manually refresh the gadget from the gadget menu or by refreshing the page itself.

Structure.Gantt

Structure\*

Filter Type

No filter

Visible Rows

20

Leave empty to see all rows

Hierarchy Level

3

The maximum hierarchy level of items shown on the chart. Leave empty to include everything.

Start From

Project Start

First date visible on the chart

Zoom Level

Weeks

Year Start

January

The selected month will be used as the start of the fiscal year for dates on the timeline.

Baseline

No Baseline
