

Colors for Jira

Colors for Jira provides JQL-based color highlighting for enhanced issue navigation.

The screenshot shows the Jira web interface. On the left is a sidebar titled 'Open issues' with a 'Switch filter' dropdown. It contains a list of issues, each with a colored icon and a label: JTCE-9 (green) 'Recovery winch', JTCE-13 (blue) 'Build shaft', JTCE-11 (red) 'Heat shield', JTCE-1 (purple) 'Journey to the center of the Earth' (highlighted), JTCE-8 (yellow) 'Capsule', JTCE-2 (green) 'Drill hole into Earth's core', and JTCE-12 (red). At the bottom of the sidebar is a '+ Create issue' button. The main area displays the issue 'Journey to the center of the Earth' (JTCE-1) under the epic 'Journey to the Centre of the Earth'. It shows 10 of 13 issues. The issue has a rocket icon and a status of 'OPEN'. Action buttons include 'Edit', 'Add comment', 'Assign', 'More', 'Start Progress', 'Resolve Issue', 'Close Issue', and 'Export'. The 'Details' section shows: Type: Epic, Status: OPEN (View Workflow), Priority: Minor, Resolution: Unresolved, Labels: None, and Epic Name: Journey TTCOF. The 'People' section shows: Assignee: Albert (Assign to me), Reporter: Bob, Votes: 0 (Vote for this issue), and Watchers: 1 (Start watching this issue). The 'Description' section has a placeholder 'Click to add description'.
