General Settings

In the General tab you can define the essential elements of your Gantt chart configuration:

- Name
- Description
- Calendar. This calendar will be used for displaying the chart to the users. Please check the Calendars section for more details.
- Owner. Only the owner and Jira administrators can change the configuration. When there is no owner defined, anyone who has permissions to create new structures is allowed to edit the configuration.
- Sharing. You can share your configuration with other users. They will be able to see it and use it in their Gantt charts, but will not be able to change it.

> ⓘ If you share your configuration, and someone uses it in their Gantt chart, you may not be able to delete it. Check the Permissions section for more details.
