

Why has Structure made this change?

The entire Structure family of apps already worked well on Data Center, but the Data Center approved apps program is about more than just working well. It's about developing and testing apps to the specific needs of a data center environment – which is very different from the needs of a server environment.

The approved apps program means our apps are held to a higher standard – and as Data Center requirements change, so too will those standards. For us, this means we can continue to provide the best possible experience for all of our customers.
