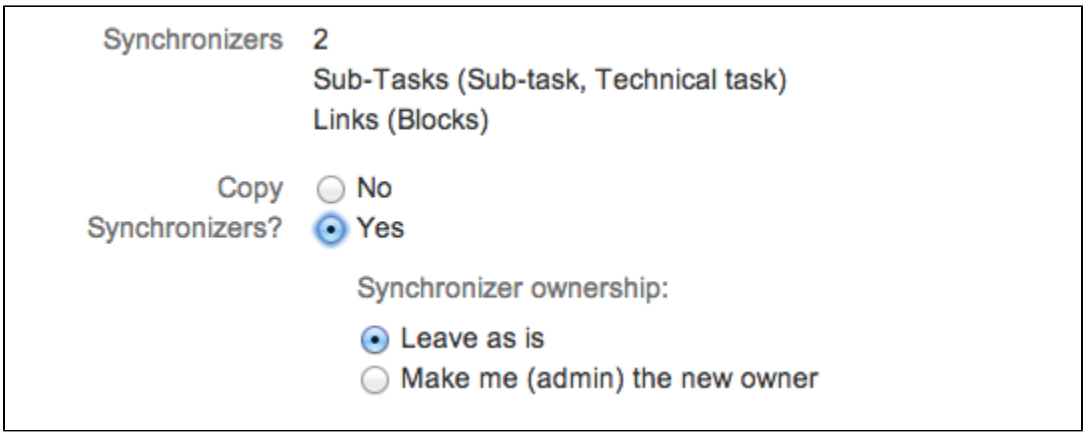
Copying Synchronizers

When copying a structure that has synchronizers, you can use the **Copy Synchronizers** option to make Structure plugin create a copy of every synchronizer installed in the original structure.

> ⚠ If you don't see the **Copy Synchronizers** option, then you probably have no permission to create synchronizers.

Synchronizers Copying Parameters



You can decide to leave the original ownership of a synchronizer ("**Run As**" parameter) or make yourself a new owner for each of the copied synchronizers.

> ⚠ Only JIRA administrators can change synchronizer ownership.

> ⚠ Making yourself the new owner means that all synchronizers in the copied structure will run under your account.

Required Permissions

To be able to copy synchronizers you need a permission to create and configure synchronizers.

Copied Synchronizers

When structure copying is complete, all of the copied synchronizers become disabled until you run **Resync & Enable** manually. To use them, you need to review their configuration, adjust if necessary, and run **Resync & Enable**.
