## Structure 3.3.1 Release Notes

22<sup>nd</sup> of September 2016

Structure 3.3.1 is a patch release based on Structure 3.3.

Download the Latest Version Structure on the Atlassian Marketplace

## 1. Patch Release

If you are using Structure 2, we encourage you to read Structure 3.0 Release Notes - a lot has changed in Structure 3!

This is a patch release based on Structure 3.3. We have addressed the following issues:

- Fixed: exception during Structure restore from version 2.x.
- Fixed: dropdowns on Agile boards stop working after clicking on an issue key.
- Fixed: Structure disappears on an issue page after clicking on an issue key.
- Fixed: dropdowns stop working after issue page refresh.
- Fixed: exception in DefaultWorkflowSchemeManager.
- Fixed: incorrect initialization leading to "dangerous call" StructureRuntimeException.
- Fixed: slow loading of Agile boards based on structure() function.
- Fixed: warning in the logs about Inserter/Extender Duplicates Generator.

Upgrade is recommended for all Structure users.

## 2. Installation

If your JIRA server does not have Structure yet, the installation is simple:

- Download and install Structure add-on, either from Atlassian Marketplace or from Download page. Pick the correct version based on your JIRA version!
- 2. When Add-on Manager reports about successful installation, click Get Started to visit a page with important guidance for the JIRA administrator. You may want to also check out the user's Get Started page, available under "Structure" top-level menu.
- 3. Monitor catalina.out or jira-application.log for log messages from Structure.

## 3. Upgrade

- If you're upgrading from version 2.11.2 or earlier, please read Structure 3.0.0 Release Notes.
- If you have installed Structure 3 beta or release candidate, please read Structure 3.0.0 Release Notes.

Upgrade procedure from versions 3.0.x is simple:

- 1. Consider backing up JIRA data. Use **Administration | System | Backup System**. Starting from version 3.0.0 Structure data can be backed up together with JIRA data. (If you have a large instance and have proper backup strategy in place, you may skip this step.)
- Install the new version of the plugin.
- 3. Monitor catalina.out or jira-application.log for warnings or errors.
