

# Insert Generators

Insert generators allow you to automatically add issues to the structure. The following Inserters are available in Structure Cloud:

- [Agile Board Inserter](#) — Adds issues from a selected Agile board into the structure.
- [JQL/Text Inserter](#) — Adds the results of a JQL or text search to the structure.

## Always Up-To-Date

Generators run every time you open a structure, so the list of issues added by the Insert generator is always up-to-date.

Additionally, if issues change as you work with the structure, they will be added or removed accordingly, based on the rules of your Insert generator.
