Creating Your First Gantt Chart

There are two ways to create Gantt charts with Structure.Gantt, depending on whether you are working from an existing structure or starting from a Jira project or Agile board.

- If you are already familiar with the Structure app and wish to create a Gantt chart for an existing structure, see Creating a Gantt Chart from an Existing Structure
- If you are new to Structure or wish to create a chart for a project for which you have not already built a structure, see Using the Gantt Chart Template
