

Structure Cloud Roadmap

When opened in a viewport, the user will be redirected to: <https://wiki.almworks.com/documentation/structure/latest/cloud/structure-roadmap-130885059.html>.

Updated On	Dec 2021
Next Update	Feb 2022

In this roadmap, we'd like to share some of the features the Structure Cloud team is going to work on in the near to mid term. The scope of the roadmap is 1 to 2 years.

A few notes and disclaimers about the roadmap:

- We only list **new, important functionality** – we are also going to work on other things, such as improving existing features, improving quality, improving user interface and adding minor features.
- This document lists upcoming features for the Cloud version of Structure. We're also working on the Server and Data Center versions of Structure and several Structure extensions, which have their own roadmaps.
- The roadmap is subject to change. We will update it periodically so it reflects our current vision.

Don't miss an update – subscribe to the [Structure Cloud release notes](#)!

Roadmap

Here is the list of major features that we're planning to work on:

- **Formula column** - create Excel-like formulas in Structure, based on issue fields and other issue attributes
- **Sort by column** - sort rows by the values in a column
- **Structure in Confluence** - show a structure on Confluence pages
- **Inline creation** - create items in a structure faster with an inline dialog
- **Time in Status column** - add a column that calculates how long issues have been in a particular status
- **Text search in a structure** - search for issues in a structure using a text query
- **Notes column** - add notes to issues in a structure
- **Write values to Jira** - copy values from Structure into Jira fields (Attribute to Field Effectors)
- *And more...*

Recently done

Here is the list of major features which were recently implemented:

- **Undoing changes** - undo the last operation in the structure: remove items, drag & drop, cut & paste (Dec 27, 2021)
- **Copy structures** - copy existing structures instead of creating them from scratch (Dec 27, 2021)
- **JQL search in a structure** - search for issues in a structure using a JQL query (Dec 2, 2021)
- **Support for migration from Server & Data Center to Cloud** - migrate structures using the Atlassian Jira Cloud Migration Assistant (Sep 28, 2021)
- **Quick Filters** - set up JQL-based filters that can be applied/removed with one click (Aug 20, 2021)
