Issue Clipboard

Issue Clipboard secondary panel allows moving issues within the structure, and, more importantly, between different structures.

There are two main scenarios for using the Issue Clipboard:

- Moving Issues Within A Structure — Instead of using drag-and-drop function to move the issues within a structure, you can use the cut/paste feature. This is especially convenient, if you have a large structure and, for example, need to move some issues from the top of the structure to the bottom or the other way around.
- Copying Issues Between Structures — The contents of the clipboard is preserved in the current browser window, which allows you to copy issues from one structure and paste them into another.
