

Agile Gantt Chart Template

If you're working in an Agile environment, where tasks are assigned to specific sprints rather than scheduled for specific dates, Structure.Gantt's sprint planning feature makes it easy to visualize and plan epics and stories across multiple projects.

The easiest way to get started is with our Agile Gantt Chart template.

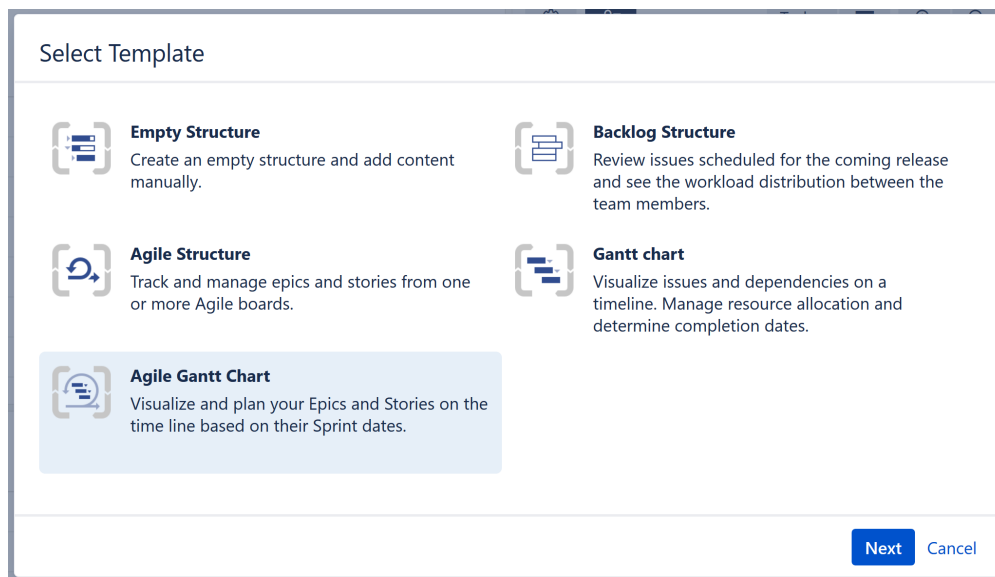

Open the Agile Gantt Chart Wizard

To open the wizard, go to the top **Structure** menu and click **Create Structure**.

The screenshot shows the JIRA interface with the 'Structure' menu open. A red arrow points from the 'Structure' menu in the top navigation bar to the 'Create Structure' option in the dropdown menu. The dropdown menu is divided into sections: 'RECENT STRUCTURES' (including 'SAFe Overview', 'Building a Theme Park', 'SAFe Planning', 'Structure.Pages Demo with Automation', and 'Backlog Grooming'), 'FAVORITE STRUCTURES' (including 'Backlog Grooming', 'Building a Theme Park', 'Gantt Chart Demo', 'John's Structure', and 'Linked to Multiple Parents'), 'DEFAULT STRUCTURE' (including 'Manually Built Structure'), and a bottom section with 'Query', 'Create Structure' (highlighted with a mouse cursor), 'Manage Structures', and 'Get Started'. The background shows the 'SAFe Overview' dashboard with a hierarchy of items like 'Portfolio Overview', 'Strategy 1', and various 'SAFe Theme' and 'SAFe Epic' items.

Select the **Agile Gantt Chart** template and click **Next**.

The 'Select Template' dialog box displays four options, each with an icon and a description:

- Empty Structure**: Create an empty structure and add content manually.
- Backlog Structure**: Review issues scheduled for the coming release and see the workload distribution between the team members.
- Agile Structure**: Track and manage epics and stories from one or more Agile boards.
- Agile Gantt Chart**: Visualize and plan your Epics and Stories on the time line based on their Sprint dates. (This option is highlighted with a blue border.)
- Gantt chart**: Visualize issues and dependencies on a timeline. Manage resource allocation and determine completion dates.

At the bottom right, there are 'Next' and 'Cancel' buttons.

Select Your Gantt Chart Options

On the following screen, you'll customize your chart.

Create Agile Gantt Chart

Agile Gantt will show the tasks on the timeline using their sprint dates. The sprints will also be marked on the time scale.

Scrum Boards* SCRUM board ✕

Planning Level Stories only ▾
Choose whether you want to see stories only, stories under epics or a deeper portfolio hierarchy

☒ Track Resource Allocation

Resource Field Team ▾
A single resource will be automatically assigned to a task, based on the value in the selected Jira field.

Scrum Boards

You can add issues from any board you have permissions for. Simply click the Scrum Boards field, locate the board you want to add, and click it. You can include as many boards as you need.

Planning Level

You can select from the following options when creating your Agile Gantt Chart:

- **Stories only** - adds all issues except epics and sub-tasks, placing them all at the same level within your chart.
- **Stories under epics** - adds stories (everything except epics and sub-tasks) beneath their respective epics in your chart.
- **Portfolio** - if Atlassian Portfolio is installed, this will add a portfolio level above epics.

Resources

Structure.Gantt allows you to track your resource requirements throughout a project, so you can see at a glance when resources are over-tasked or available for additional work.

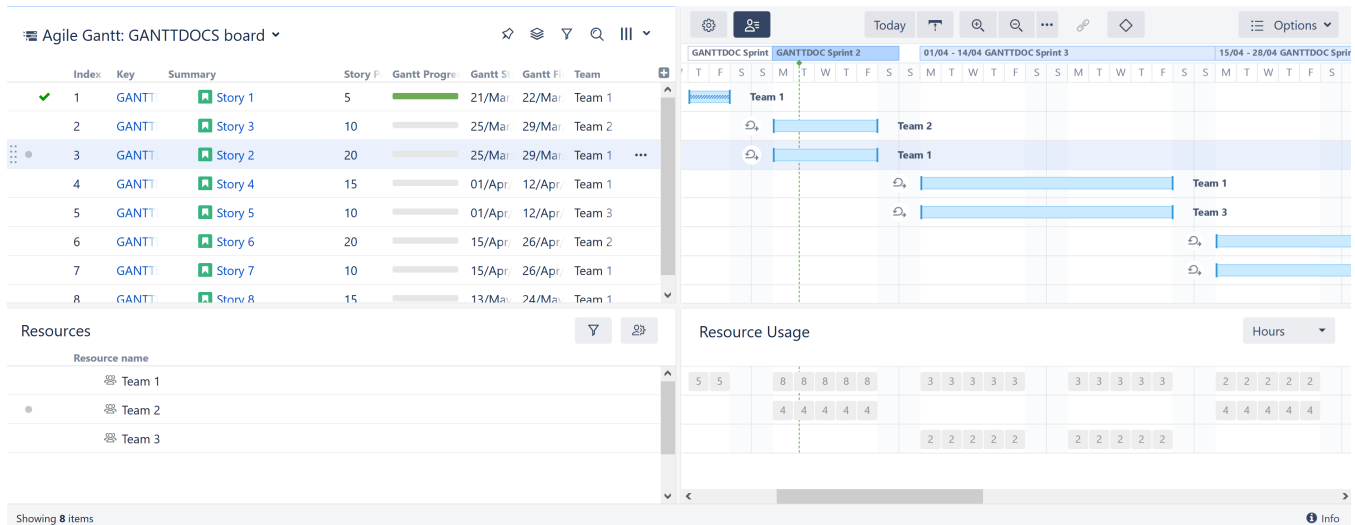

If you wish to track resource allocation, check the **Track Resource Allocation box** and select the **Resource Field** that should be used to assign resources to your tasks. You can choose from a variety of Jira fields or use a custom field or formula. Many of our customers use the Assignee field or a custom Team field.

Sharing

In the Share With section, select who the chart should be shared with. Only the people you select will have access to view the structure and Gantt chart you create. You can change or customize these settings later in [Structure Permissions](#).

Create Your Gantt Chart

Once you've selected your options, click the **Create Structure and Gantt chart** button. Your new chart will be constructed using Structure's powerful [Automation](#) feature. If you need to make changes to the issues included in your chart or how they are arranged, you can [edit the automation rules](#) later.

Issues will automatically be scheduled in your Gantt chart based on a 2-week estimate for future sprints and a custom Gantt configuration with the following settings:

- Work estimates are based on Story Points, with Time Tracking enabled if no Story Points data is available.
- The standard 40 hours/week calendar is used, unless there is no "Standard" calendar found.

To view or change these settings, see [Gantt Configuration](#).

Additional Resources

Congratulations! You've just built an Agile Gantt chart.

Here are a few additional resource to help you get started:

- If you're new to Structure, you can learn more about working within a structure on our [Structure Documentation page](#).
- If you're ready to start managing tasks with Structure.Gantt, see [Working with Your Gantt Chart](#).
- If you need to make changes to your [Gantt chart configuration](#), click the Settings button  on the top left of the Gantt screen.

To be able to create Gantt charts (even for existing structures) you need to have the appropriate permissions set for your account. To create a Gantt chart for a structure that you created, you must have permission to create new structures . To create a Gantt chart for a structure you did not create, you need Control access. If you are unable to create a Gantt chart for a structure, speak with your system administrator.
