

Uninstalling and Reinstalling Structure

Uninstalling Structure

You can uninstall Structure from the Add-on Manager the same way you uninstall other add-ons. You can also manually remove the Structure JAR from the `plugins/installed-plugins` directory when Jira is not running.

When you uninstall the Structure add-on, Structure data is **not removed**. It remains in the Jira database.

Reinstalling Structure

It is perfectly safe to uninstall Structure, then install it again. (This happens, for example, when you upgrade to a newer version.)

All Structure data will be there unless you manually remove it.
