# Managing Structures

The Manage Structures page lets you view, search for, create, and delete structures, as well as change their settings.

To open the Manage Structures page, go to the **Structure** menu in the top navigation bar and select **Manage Structures**.

You can also reach the Manage Structures page from the structure selector menu:

The **Manage Structures** page contains the following tabs:

- **Current** – shows the structure you are currently working with
- **Recent** – lists recently viewed structures, starting with the most recent/current structure
- **Favorite** – lists structures that you have marked as your favorite
- **My** – lists structures created by you
- **Popular** – lists structures that are marked as favorite by at least 2 users, ordered by their popularity
- **Search** – allows you to find a structure by name, owner or ID

- **All** – lists all structures visible to you
- **Paused** – only displayed when there are structures with Paused Automation

> Since anonymous users cannot create structures or mark structures as their favorites, **Favorite** and **My** tabs are not shown when you are not logged in.
