[Structure.Gantt on Atlassian Marketplace](#)

1. Patch Release

Starting from this version, Structure.Gantt is compatible with Atlassian Jira 8.4.

2. Installation and Upgrade

Structure.Gantt 2.0.1 requires Structure 5.5 or above.

If you already have production data from a previous version of Structure.Gantt, please consider backing up your data before upgrading.

3. Enterprise Deployment Notes

Structure.Gantt 2.0.1 does not introduce changes that could affect performance. We advise you to perform the usual testing on a staging server.
