Adding Existing Confluence Pages to a Structure

To add existing Confluence pages to a structure using Structure.Pages:

- 3. In the second panel you will see either another Structure or a JQL or Text search. Click the structure name or the JQL/Text label next to the search field and select Confluence Pages from the menu.

♦	7 Q III •	₽ JQL v	Senter J	QL query	8			
	Search Structure			Summary	/			
	RECENT STRUCTURES	ecent issues while the query						
	Structure with Pages			5 White the	query			
	FAVORITE STRUCTURES							
	Structure with Pages							
	TOOLS							
	A Text Search							
_	🔄 JQL Query		_					
	Confluence Pages							
	🖪 Clipboard							

4. This will open a search field, where you can search for pages using the exact same syntax you would use when searching within Confluence.

	₽ Pages		Search Co itle or CO		pages by	8		Ŵ		7	7	Q		Ш	~	
	Кеу		S	ummary						C	oun	t Sub	-Items			Ð
5. As you enter your search query, the results will be displayed in the panel.																
	🔒 Pages 🗸	66 permis	5			8		Ŵ	♦	7 C		ζ 🔘	III Basic view `		,	
	Кеу	Key Sum								Prog	ress		ТР			0
	Uiew Sha				nd Permissio	ns										A
			Per Per	missions												
			E Set	ting Global	Permissions											
			🖹 Str	ucture Permi	issions											

6. Once you have found the pages you need, select them in the search results and add them to the structure using drag-and-drop.
