

# Setting Up Structure License

Unless your JIRA runs on one of the [free licenses](#), Structure requires a license key to work. You can get a free no-obligation 30-day evaluation license key for your JIRA server in a few seconds.

Structure license must be set up in order for Structure features to become visible. Please install a license (get evaluation license, if needed) right after you have installed Structure plugin.

You need the *JIRA System Administrators* global permission to see and modify Structure license details.

In some cases, Structure plugin will not need a license key.

To check whether you need a license:

1. Navigate to **Administration | Structure | License Details**.
2. See section **Current License** - if there's no license there or if the license is expired, then you need to get an evaluation license or purchase a commercial license.
  - a. If Current License section says that you have Free License, then your JIRA must be qualifying for automatic free license and no further action is needed from you. See [When Structure is Available for Free](#).

## Getting an Evaluation License

To get a free 30-day unlimited-users evaluation license, follow **Get Evaluation License** link on the structure license page, or open [evaluation license request page](#) directly. In latter case please enter your JIRA Server ID to get a correct license.

## Getting a Commercial License

You can purchase a commercial license at <http://almworks.com/structure/purchase.html>

To generate a license, JIRA Server ID is required. JIRA Server ID is a 16-digit code, which JIRA Administrator can look up in JIRA menu **Administration | System Info** or in **Administration | Structure | License Details**.

## Installing a License Key

To install a license key:

1. Navigate to **Administration | Structure | License Details**.
2. Copy and paste the key to the **Install License** section.
3. Click **Install License**.
4. The installed [license parameters](#) will be displayed in the **Current License** section.
  - a. If your license doesn't fit the server, an error is displayed.

## Uninstalling a License Key

To uninstall a license key, just click **Uninstall License** on the structure license page. If there's no such button there, then no license is installed.

**Next:** Select [which projects are enabled for Structure](#)
