

Integration with Greenhopper

Question

We're using GreenHopper - are there any conflicts with Structure? Can we see the Structure's hierarchy in GreenHopper?

Answer

You can use Greenhopper and Structure side by side. Structure plugin stores its data in a separate place, so it will not conflict with any other plug-in.

By default, Structure's hierarchy and issue order are independent from GreenHopper, but you can install a [GreenHopper Synchronizer](#) to have GreenHopper Rank synchronized with the position in the Structure and GreenHopper Epic/Theme field synchronized with the stories being under epics in the Structure.

GreenHopper is not yet able to display the hierarchy as Structure does, but with the Rank synchronization the issues will be positioned in the same order they are positioned in Structure.
