Issue Clipboard

Issue Clipboard secondary panel allows moving issues within the structure, and, more importantly, between different structures.

There are two main scenarios for using the Issue Clipboard:

- Moving Issues Within A Structure — Instead of using drag-and-drop function to move the issues within a structure, you can use the cut/paste feature. This is especially convenient, if you have a large structure and, for example, need to move some issues from the top of the structure to the bottom or the other way around.
- Copying Issues Between Structures — The contents of the clipboard is preserved in the current browser window, which allows you to copy issues from one structure and paste them into another.

In general, you can select an issue or multiple issues and use the standard **Copy/Cut/Paste** keyboard shortcuts that you use for copying and pasting text.

> ⓘ   Please note that if you really have some text selected on the page, **Copy/Cut/Paste** shortcuts would operate on that text - you'll get a copy of the text in the system clipboard, and Structure clipboard will not be affected.
